## FULL STACK JUNIOR SOFTWARE ENGINEER

Passionate and ambitious Software Engineer driven by the belief that every problem has a solution. Fueled by the culmination of a rigorous three-month web development bootcamp at DU, I've harnessed hands-on expertise in crafting robust REST and GraphQL web applications. I am now poised to harness my enthusiasm and development skills into a collaborative and stimulating professional arena. I am enthusiastic to embark upon my next journey.

### EDUCATION

**Certificate, edX Full Stack Web**

**Development Boot Camp**

*University of Denver, Denver, CO 2023*

**Bachelor of Fine Arts in Theater Performance**

*Wayne State University, Detroit, MI 2012*

### SKILLS

*MERN | MySQL | REST | GraphQL | JavaScript ES6 | MySQL*

*NoSQL | PWA | Git flow | OOP | State | Express*

*Communication | Team Player | Task-Oriented*

*Growth Mindset | Problem Solving | Self-Learner*

**Currently Learning:** *Jest, Redux*

### CLASS EXPERIENCE

*Team Project Collaboration | Application Framework | Database Diagrams | MVP vs Scalable App*

*Debug & Troubleshoot | Project Demonstration & Storytelling | Agile Development | Project Management*

### PROFESSIONAL EXPERIENCE

#### CONSULTANT

**Andrick Siegmund Consulting**, Denver, CO

August 2023 - current

- Guide entrepreneurs through website development strategies to reach a broader spectrum of clientele, increasing business impact.
- Modernize and streamline processes, mitigating clunky third party methods to yield efficiency.

#### **Current Project:**

- Refactor WordPress website to React using MERN strategy for nonprofit, Universal Design for Learning website.
- Create ability for user authentication, authorization and form usage, generating a database to derive the intentions of the primary audience, with a focus on evolving a more effective service.

#### STUDENT

**University of Denver**, Denver, CO

May, 2023 to August, 2023

- Executed intensive, daily activities to learn multiple aspects of web development: HTML, CSS, JavaScript ES6, DOM, APIs, JSON, Node.js, OOP, Express.js, MySQL, MVC, Agile, PWA, React, NoSQL, and State.
- Engaged in rigorous group challenges, testing freshly gained knowledge to develop custom applications while operating with agile methodologies.

#### *Main Projects:*

**Chat 98 (Final Project):** A nostalgia based instant message application. As a front-end practitioner, I implemented the authentication and authorization using JSON web token strategy, built out the entire login/signup modal, and created an avatar selection page which allows users to pick a premade avatar that is then assigned to their account and displayed on user and user friends chat windows.

**Blueit (2nd Project):** A custom take on a blog post site. As Scrum Master and back-end practitioner, I ensured team progress with regular update meetings throughout the project, and built out the majority of the RESTful architecture.

**Dr.Drink (1st Project):** A front-end, drink recipe application. As Scrum Master and the sole javascript developer, I kept my team on track with daily update meetings and built out the entirety of the functionality for the application.

---

*previous-career experience*

**RESTAURANT INDUSTRY PROFESSIONAL**

**Multiple Establishments**, across multiple states
